## LOG HOMES & CABINS

- Floor: 2x8 floor joists, 3/4" OSB T&G sheathing.
- Log Walls: Timberline logs are three sided spruce logs. They are 6" or 8" diameter, and are all uniformly milled to ensure beautiful construction.
- Loft: Includes 1/2 loft with stairs.
- Insulation: Fiberglass insulation between each row of logs.
- Doors: Metal insulated door.
- Windows: Standard double paned openers, or plate glass. All door and window frames are splined to keep walls straight.
- Roof Package: Framed with 2x10 rafters, 1x6 perlons & metal roofing. (light brown, dark brown, red, blue or green)

We will build on site.

The completed product will be a weather tight shell that you can complete and customize as you like.

Packages are available for you to construct yourself. Log walls are pre-cut, pre-drilled, and numbered for easy construction. Packages include the logs, floor, loft and roof materials, doors and windows.

The cost is by square foot. The square footage is figured on the bottom floor of the home you choose. This cost may vary depending on additional features and finish work you choose.
